SUMMARY

I am a highly adaptable computer science graduate having learned to thrive in the remote-online environment that businesses must navigate to not only survive but prosper. I have developed my problem solving and interpersonal skills through my time at Bank of America as well as my work experience in the service industry. I am eager to bring a fresh approach and new ideas to a dynamic company and become an integral team member charged with solving the next generation of issues that have been thrust on the business world.

EDUCATION

Mississippi College, Clinton, Mississippi   Dec 2020
